

Information: Traffic restrictions (Entry the Ise-Bay restrictions) in the Irago Suido Traffic Route

When a large **Tsunami warning** is issued by the Nankai Trough earthquake, we will enforce **traffic restrictions (Depart only) for vessels** based on the Marine Traffic Safety law in the **Irago Suido Traffic Route**.

1. Entry restrictions start and release time

- (1) Start : When a large Tsunami warning is issued by Japan Meteorological Agency.
- (2) Release: When the above warning is released (Including switching from weather Warning to Advisory) *Sub-prefecture region: Aich Prefecture open sea ,Ise-Mikawa bay, Southern of Mie Prefecture.

2. Target vessels and navigation restrictions

- (1) Target vessels : **All vessels**

However, exceptional vessels are as follows,
an inbound vessel navigating in the Irago Suido Traffic Route and a vessel approaching the traffic route where it is difficult to change course safely under the captain's judgement.

- (2) Limitations: **Not to enter the Ise-Bay in the traffic route.**
- (3) Restricted area: **In the Irago Suido Traffic Route** (see below the Reference Diagram)

3. Notification method

Notice for vessels on VHF radio wave channel 16 and AIS.
